Address: Rua Conde do Rio Maior 19, 1B, 2770-038, Paço de Arcos , Portugal (Home)

ABOUT MYSELF

Tech-savvy professional with a Computer Networks and Systems degree from ESNIDH, specializing in Network Management and Programming (C, Python, Java). Certified by CISCO Network Academy and further trained in Full Stack Web Development at EDIT School and Digital Marketing at Lisbon Digital School, with Google Academy certifications.
Experienced Quality Assurance Tester with expertise in automation tools and API development. Fluent in English, French, and Italian, I excel in multicultural teams, bringing a proactive and adaptable approach. Eager to tackle challenges that enhance my technical and interpersonal skills in innovative projects.

WORK EXPERIENCE

02/2022 – 08/2024 Oeiras, Portugal
JUNIOR FULL-STACK DEVELOPER | QA TESTER | TOOLS AND AUTOMATION SERVICES. LOGICALIS PORTUGAL

Context:
I specialize in creating automated scripts in Java and Python for functional (E2E), integration, and unit tests, generating detailed error reports. Integrated these systems into CI/CD pipelines using Jenkins and SonarQube, with containerized deployments on servers. Additionally, I developed scripts to automate data integration from CISCO APIs into Logicalis databases, optimizing information flow. This resulted in a consistent internal database with up-to-date insights on products, certifications, incentives, sales, and contracts. My expertise in automation and DevOps practices enhances system reliability and performance, making me a valuable asset to any tech-driven team.

Main Activities:
- Analysis and architecture planning, code development and implementation, testing and maintenance, and API integration processes.

Technologies:
- Java, Python, JS.
- Selenium, Spring Boot, Maven, Flask.
- Behave, Pytest, Junit, Cucumber, TestNG, Allure.
- Bitbucket, Jenkins, Docker, SonarQube.
- Postman, CISCO APIs.
- Make (Integromat), Power BI Microsoft, Ninox (Database)

02/2021 – 07/2022 Lisboa, Portugal
WEB DEVELOPER FREELANCER

Context:
The work consists of website development and management based on analytical Google tools for optimization to improve the performance of websites.

Main Activities:
- Website development and management.
- Analysis and optimization of website performance

Technologies:
- Google Search Console, Google Analytics, and Search Control
- HTML5, CSS3, PHP, JSP, JAVA, AJAX and Python.
